OSAMA JARADAT

+962777112843 | osama.jaradat@proton.me | linkedin.com/in/osama-jaradat | github.com/Oso00Luffy/ | www.osotech.me

Summary

Cybersecurity graduate with hands-on experience in log analysis, threat detection, and offensive security labs. Experienced in administering Linux infrastructure, enforcing domain authentication standards (**SPF, DKIM, DMARC**), and deploying centralized log aggregation tools (**Loki, Grafana, Alloy**). Passionate about SOC operations and security automation.

Education

Tafila Technical University • Tafila, Jordan
Bachelor Degree of Cyber Security — February 2022 – November 2025
Graduation Project: SCC_APP – Secure Chat & Encryption Platform.

- **End-to-end encryption**, session validation and **4 encryption techniques**.
- Integrated with **Firebase** for authenticating users securely
- Built a **Secure Chat System** with encrypted messaging and protected session

Experience

Mnasati Technologies • Amman, Jordan • (On-Site)
Junior System Administrator Intern — September 2026 - Present

- Administered **10+** Linux server environments, managing **OpenResty/Nginx** reverse proxies and **Postfix** email relays.
- Enforced **SPF**, **DKIM**, and **DMARC** security protocols across primary domain stacks, maintaining **99%+** deliverability.
- Automated diagnostic and server management workflows using custom **Bash scripts**, cutting manual tasks by **30%**.

Consultation and Training Center - PSUT • Amman, Jordan • (On-Site)
Summer Camp Instructor - Python & Unity — June 2026 – August 2026

- Designed and now delivering two parallel coding tracks for students aged **12–18** at PSUT's Summer Coding Club.
- Built the full curriculum from scratch - **Python (fundamentals to OOP)** and **Unity game development with C#**.
- Managing mixed-ability groups with differentiated instruction across **20+ sessions** per track.

CrossRealms International • Amman, Jordan • (Remote)
Penetration Tester Intern — July 2025 - September 2025

- Performed reconnaissance, exploitation, and vulnerability remediation on **3 intentionally vulnerable systems**.
- Conducted offensive security labs using **30+ Kali Linux tools** in VM environments (Kali Linux, Metasploitable 2/3).
- Implemented automation using **Hexstrike MCP** to speed up penetration testing and security analysis workflows.

Jordan Data Systems • Amman, Jordan • (On-Site)
IT & Network Intern — July 2024 - September 2024

- Provided technical support for **50+ client endpoints**, resolving OS, network, and hardware incidents.
- Assisted in configuring and maintaining **Aruba networking infrastructure**, improving network stability and uptime.
- Optimized **wireless access points** to improve network coverage and connectivity across a hotel environment.

Certifications

AWS Certified AI Practitioner • Amazon Web Services (AWS)	August 2026
Cybersecurity Defense Architect • Splunk	May 2026
Google Cybersecurity • Google	March 2026
OCI 2025 AI Foundations Associate • Oracle	October 2025
Advanced Data Analytics • Correlation One Tech for Jobs	June 2025

Skills

Security & Networking

- Network Security (TCP/IP, VLANs, OSPF), Linux Administration & System Monitoring, Git & GitHub.
- Access Control, Vulnerability Assessment, Threat Detection, Incident Monitoring, Information Privacy, CI/CD.
- Security Data Analysis (Python (Automation & Scripting), Log Analysis, Excel, Tableau).

Soft Skills

- Analytical Thinking, Problem Solving, Attention to Detail, Communication.
- Technical Documentation, Team Collaboration, Continuous Learning, Adaptability.

Honors & Activities

Languages: Arabic: Native Speaker | **English:** Expert (C1)
